

## **How to calculate the fee to be consumed out of the fee deposited for 15 years**

In cases, where the industry had already obtained consent to operate for 15 years and the same is still valid, but the industry has applied for varied consent the fee is to be calculated as under:

Suppose the industry was granted consent to operate for 15 years in year 2002 and it had deposited Rs. 'M' on account on consent fee against Gross Fixed Assets of Rs. 'A'. The said consent is valid upto 31/3/2017 and suppose the industry also made expansion in the year 2006-07 but did not obtain varied consent at that time. The value of Gross Fixed Assets had become Rs. 'B' in the year 2006-07.

The fee consumed for the period 1/4/2002 to 31/3/2006 = 'M' X 4/15

Balance fee available from Rs. 'M' already deposited = M - ('M' X 4/15)

Further the fee is to be calculated as illustrated in **Annexure- 21**.
