## 1. DISTRICTPROFILE

Sri Muktsar Sahib District is located in South Western Zone of Punjab. It lies between 30° 69 and 29° 87 latitude and 74° 21 and 74° 86 longitude. It is bounded by States of Rajasthan and Haryana in the South, district Faridkot in North, Firozpur in West and Bathinda in the East. It covers an area of 2632sq km, which constitutes 5.19 % area of Punjab. The Western Himalayas in the North and the Thar Desert in the South and Southwest mainly determine the climate conditions. The South -western monsoon brings the much needed rain bearing depression during summer (July to September). Nearly 70 % of rainfall is received during three months ( July to September) , when South Western monsoons are active in the region. There is wide seasonal temperature variation with Mean Monthly Maximum Temperature being as high as 45 degree C in June and Mean Monthly Minimum Temperature as low as 2 degree C in January. The major parts of the district qualify for aridic (torric) moisture regime according to the criteria laid in Soil Taxonomy. Sri Muktsar Sahib has total population of 9,01,896. The percentage of rural population to the total population is 72% . Sri Muktsar Sahib has population density of 348 persons per sq. Km compared to 551 persons per sq km of the Punjab, which is the lowest in Punjab. There are 896 women for every 1000 men in the district. **(vi) Climate**

Climatically, the Western Himalaya in the north and the Thar Desert in the south and south-west mainly influence the climatic conditions. Since the city lies far away from the Sivalik Hills, and any of the major rivers, it experiences an extreme climate situation. Summers are extremely hot, and winters very cold. The city experiences four distinct seasons - spring (February - March), summer (April - August), fall/autumn (September - October) and winter (November - January), along with the monsoon season setting in towards the later half of the summer. Summers, from early April to mid October, are typically very hot and humid, with an average daily June high temperature of 104 °F (40 °C). The season experiences heat indices easily breaking 110 °F (43 °C). Winters are very cold and foggy with few sunny days, and with a December daytime average of 37.4 °F (3 °C). The Western Disturbance brings some rain in winters that further adds to the chill. Spring and autumn are mild and pleasant seasons with low humidity. The monsoon season usually starts in the first week of July and continues till August. Thunderstorms are not uncommon during the Monsoon. The mean annual rainfall fluctuates around 425 mm. About 71 per cent of the annual rainfall in the city is received during the monsoon season.
